Subject: RE: EPA Call on Thursday

Dave,

I will work on getting the date changed. I know that EPA wants to move forward quickly and I understand why, but it seems that we should resist this rush in so far as we have not yet determined that the plume in the neighborhood and the potential VI issue belongs to Meritor.

Jim:

If you can get Brian to change the date, please reschedule. I would hope by early next week at the latest. EPA wants to move forward quickly.

Subject: EPA Call on Thursday

Dave,

I think that Thursday is too soon for the technical call with EPA. We would be prepared to talk about the VIRA and their comments, but we will not be ready to discuss the overall issue of potential VI issues in the neighborhood and the associated groundwater plume. There are too many moving parts here and data that we do not yet have in hand.

Also, Paul has not yet confirmed his availability for the call and his presence on the call will be essential regarding some of the technical aspects of the VIRA. I suggest that we indicate that our team is not available for the Thursday time slot and that we wait until after the internal call on Wednesday to set a time for the call with EPA.

Please let me know your thought on this.
